

1. Projects (Boards)

- Each project is like a **Trello board**.
- CEO or HR can create projects and add employees to them.
- Each project has a name, description, start date, **project-level deadline**, members, and overall status.

2. Lists (Task Stages)

- Each project has **columns/lists** to represent task stages:
 - Backlog
 - To Do
 - In Progress
 - Review
 - Done

3. Tasks (Cards)

- Each task belongs to a project and has:
 - Title
 - Assigned employee(s)
 - Priority
 - Status (linked to the lists above)
 - Task-level deadline (cannot exceed project deadline)
 - Description
 - Checklist/subtasks
 - Attachments (optional)
 - Comments section
- **Any project member** can create and assign tasks to other members.

4. Task Comments

- Members can **add comments** to tasks for feedback, discussion, or review.
- Comments should notify the assigned employee(s) and relevant project members.
- Useful for reviewing tasks before marking them as Done.

5. Moving/Updating Tasks

- Tasks can be moved between lists as work progresses:
 - To Do → In Progress → Review → Done
- Updating checklists or marking subtasks as complete should be supported.

6. Notifications

- Notify members when:
 - They are assigned to a task

- A task receives a comment
- Task or project deadlines are near

7. Role-Based Permissions

- CEO & HR: Can create projects, add/remove employees, assign tasks, comment, and move tasks.
- Employee: Can view their projects, create tasks, assign tasks to project members, comment, and move tasks.
